

LA Unscripted | July 21st, 2023

From hot spots and hidden gems to lots of local flavor is your guide to L A the unscripted way And tonight we have got something great to whine about It's called one of the best kept secret destinations in Orange County California But lucky you We've got your unscripted invite Hello everyone I'm Devin And tonight we're revealing Newport Beach Vineyards and winery So let's get to touring tasting and of course drinking So I discovered this property on the market in 1998 and bought it 3.5 acres People didn't think I could grow vines in Newport and I started doing more and more research and found out that actually the city of Anaheim was founded by the Los Angeles Wine Society one time they were gonna call it Grape County instead of Orange County I'm here with Tayla Moriarty and you're the co owner here of the Newport Vineyards and winery And we're going to actually do a tasting today right OK Tell me about these wines This is our state wine here You make it on the property We grow the grapes here We make the wine right here Richard's the winemaker do you want to have a taste Let's drink It's wine o'clock And why not So when people come is this kind of similar to what they do they get to taste The wine is the exact set up that we would have the bar set up the same way And this is for tasting We always have four wines two red and two white Amazing And the goat come the goat come on I thought that was e this Winnie fill in scripted It's on 24 7 in our house And so we've watched all the crazy things you guys have done So we have a goat brunch that people go to We thought this was very appropriate for what you do Fruity Pebbles Cheez its granola goldfish I mean they like the same snacks I do minus the paper We're number one on Yelp for bridal showers A tour and tasting is our most popular event We taste some wines and take a tour of the gardens This comes with the yeah with our tasting we do other events in here as well We ended up building a wine cave This is all done in 1998 The cave is basically for passive barrel storage but has become quite an event spot Oh my God this is insane What so what is this what we would call this the Man cave I think So the girls are girls like the goats in the in the wine cave This is more for the boys The city has deemed us to be open by appointment only So but you can make an appointment for two people or 200 Oh wow This says Ring for Roge Ok That's interesting Oh my God thank you Oh my God This place is perfect for a fun event Like say your 30th birthday kind of like I just had or so cow girls like to call it the dirty 30 it's a big one especially if you're Christa Allen Now you may remember her

as the 13 year old in 13 going on 30 But these days she's a Tik Tok star double I started tiktok actively in March of 2020 right As the pandemic was like kicking off in the full swing It was a chance for me to really be creative and fun I wanna end me I think my most viral video of all time was the one in which I recreated some scenes from 13 going on 30 They loved it It reached like 20 million views and it was just wild My favorite thing about tiktok is how it really feels like a community And tiktok is where we all come to just be human and it feels like one big inside joke between millions of people because we're all laughing at the same stuff I've been wanting to make the perfect cup of coffee at home So I called over a friend to show me how to talk has changed my life in pretty much every way from meeting new and interesting people to creating all sorts of business opportunities Tiktok is now where all the eyeballs are So there's the opportunity to sell ad space there as well You know the reality is I spend 24 hours a day uh thinking about tiktok when I'm not actively creating I'm thinking of things in tiktok term Part of me wants to be her but then part of me wants to be her I think the best thing you can do as a creator is to just really listen to your audience because they will tell you what they want to see more of Then you just give them what they want to see Hey let's toast to Krista I mean I'm just really making excuses now because the wine here is amazing now Just so you know I'm not just a wine drinker I know that's shocking I'm also a winemaker Hello Thanks to this Dana dare with Megan Tell us so Dana here's another dare OK How about you make your own wine How about I drink my own wine You drink your own wine How about we drink your own wine Yeah I love that No no no Are you more of a red or anything wet drinker OK We've got Michael and Magdalena and we're gonna go through how to blend our own wine right How did you guys get started with this idea We went on a trip to Argentina where we actually did a blending experience there and we kind of came back and said how does this not exist in L A We basically created blending as the main concept for our winery So not only do we produce blends but we invite customers to come in to our blending classes to learn a little bit about wine figure out what they like about wine and then blend their own wine to go And then we actually created a like a a reference booklet to actually guide people through uh e exactly what you would have experienced in class but on your own So we have the booklet here And what I noticed is that it says red wine blending So Dana is this all red wine Is the question Yeah Are we doing just red wine though When you come into the class you kind of learn about each of the individual wines and

then start blending to your own flavor profile You can kind of figure out that even if you're not constantly a red wine drinker you'll find something that you like The first thing to do is to make sure that the three beakers that came in the kit have wine in them I challenge you to blend 12 and three first and then we'll get a double date What I want you to do is this is a 50 mL graduated cylinder So I'd like to go a little bit heavier on two versus three So fill 30 mL of number two the cabernet and then top it off up to the 50 with 20 mL of three Wow that is so much better They like evened each other out and kind of complemented each other Now when we get really serious about wine blending sometimes we really only wanna add small fractions of a percent of a wine OK Maybe dip this into wine Number one try to extract I actually like it more It added one more like dimension What would you pair this with By the way if this was like if this is a wine what would you pair this with I mean honestly the first thing that comes to mind is pizza We're gonna be like hammered and having the best wine ever and drinking pizza drinking pizza on her OK So my producer just took my wine away because we're only in the A block and we still have a whole show to do so we'll be right back All right I'm gonna eat some food now Mm Welcome back to L A unscripted from the Newport Beach Vineyards and winery and check out this man made wine It is so cool You guys and you can actually host a party in here for 60 of your closest friends We've had as many as 60 people sit down for dinner in here which is pretty spectacular and put a whole whole table in there The wine cave is basically 1000 square feet 85 ft deep The doors are made out of reclaimed mahogany from Philippine pallets They weigh about £2000 a piece You know I would definitely be that one person that ends up locked in the cave all alone But you would have wine Scary Yes but nothing compared to what Olivia in L A is up to I'm about to get wild and soaked right here at wild rivers But can I just stay in the lazy river Look how nice that I'm gonna hit the slides But first let me change Wild Rivers is California's newest water park Um We have a whole bunch of the state of the art attractions We have over 20 rides and attractions here at Wild Rivers Um We have a whole island full of water slides for the younger kids Um Little kids like preschool It's a smaller version of some of our bigger slides So they don't feel left out The parents can play for hours with them over there We have a river that runs all the way around that island for the kids to play in and the parents to relax in number two And then we have the more thrilling water slides we have I can plan which is our a coaster and it has a master blaster Most water slides they just take you down with gravity This one shoot you right back up So it's a

really thrilling ride Orange County is amazing especially here in Irvine where we're at the community just really embraces wild Rivers That's a part of their family and it's just a great place for people to come and enjoy a day out in a family friendly environment The new Wild Rivers location is themed kind of around the El Toro Marine Base Actually where we're standing used to be the runway of the marine base where all the planes would take off to go to the Pacific Theater for World War Two The the of the new park is basically the Pacific The we have our Pacific where you can get your food The Mustang Bar which is named after a fighter plane and then you'll notice at the entrance when you come in it looks like a runway to a water park or really anything without food And I'm so excited What type of food do you guys have here Well as you can see we have pizza we have this lovely summer salad We have hamburgers made with grass fed w be last time we came here it was just a regular old dirt pile and now we're back and it's one of the greatest water parks in southern California Olivia You earned your bravery badge Me I earned this coat of 1000 court All right Coming up I break in our new San Diego sister Show local is the literally and we in the night with a few brews hang gliding is a gravity driven aircraft where you just find a large hill and you run off of it And just by the fact of you slowly falling through the air that drives you through the sky Now this is not just for tourists You can actually see all of San Fernando Valley You can see downtown L A And if we get really up high you can see clear across the water to Catalina Island So it is the perfect place to experience your own hometown from a whole new perspective So this will be what's supporting you and it's actually what will pull you into lane down position like Superman win sports is one of the oldest and largest hang gliding schools especially in Southern California We've been teaching and flying here for over 40 years and it's where you can really achieve your dreams of flight So we can't use the F word fall Yeah we're not falling we're not skydiving we're not a rock we're a bird we fly we're using the other F word flying I started hang lighting here back in 1982 with my good friend Joey was my best friend in high school And for my very first flight I was just hooked Some people might be watching this and they'll think you know it sounds amazing but I am terrified of flying We like to say it's as safe as the pilot who's flying it So you can make anything dangerous or anything safe Basically by how you approach it Congrats You're an official student pilot Yes I have the official paperwork No big deal Cameras are rolling I'm geared up and we're about to take flight and it's hard to leave a day of flying and not have a huge

smile plastic on your face and you just leave all your worries behind on the ground That was the greatest thing ever I'm obsessed Thank you so much Just like that We did it Welcome back to L A unscripted from the Newport Beach vineyards and winery And I want you to be the kids yet The goats Oh my God Winnie And these are their beautiful fur babies and they're just another part of the magic here and they even have their own brunch You can attend on Sundays I mean I hear it's a real kick a head but in good time here we have the pinot noir So when people come is this kind of similar to what they do they get to taste the wine This is the exact set up that we would have the bar set up the same way We always have four wines two reds and two whites And do the goats come the goats come yay the goats come they make an appearance Now about to show you how I helped our new sister show the localist SD kick smash and break their way onto the airwaves Literally kind of like these guys check out our total razor at the break room guys It's actually totally legal Look at this How long did it take you to get here this morning I think a hair under three hours Oh my God On a weekday morning driving from San Diego to L A You must be exhausted and frustrated and stressed totally I mean you hit the nail on the head Ok Well I have the perfect way for you to get all of that out You're going to break this Oh it's so pretty That's a rookie mistake I am the pro I will guide you Are you ready Yeah ready Ready go breaker L A is a cool interactive spot here in Van Nuys California We have stuff from a shot glass up to a car So whatever you think you could break here we have all different activities ranging from rage rooms to ax throwing to paint splatter and you basically go in a room and there's no rules and you can splatter paint everywhere ax throwing It's like a cooler version of uh darts They're almost set up as bowling lanes and instead of a dart you're throwing a hatchet at the wood and there's a target on it I think definitely some people have some pent up stuff that they want to just release and let out And here's the perfect place for it Ok So we're going to get dressed because when you do I mean glass gets everywhere It's everywhere So tell me about localist The localist at sea is about living like a tourist in San Diego So think tourists but local local So we're hoping to find some fun stuff for you to do the next time you're in You ready Ready L A unscripted localist SD let's go So what have been some of the favorite stories that you've done in San Diego I would have to say the tacos and beer scavenger hunt You drive along the coast looking for tacos and beer like so much But it's so funny I feel like talking to you that you are like my soul sister on another show twins That's exactly right And people are even saying we look exactly

alike for the back look A lot of all the cool stories that we've seen so many of your segments Why do you want to bring me here Why is your favorite question OK So this is actually one of the very first stories we did for scripted We got so much good feedback on it but it's also so visual and so stress relieving You're going to leave here exhausted So the cars they they're going to a junkyard anyway So it's I call it a cool step along the way Some people are a little uh scared at first to start but then once they do They usually just let out and have a blast It's so great to have L A unscripted back here and then for them to bring up their friends localist SD here to experience break room And after a day like that we all need a drink Am I right The Saw Festival is been going on for over 50 years It is a group of artists that um came together decided to do an alternative festival from the pageant and the festival of arts And we are have the reputation of being The Rogue Festival We are um an artist run festival on artist owned land with an artist run board of directors which is pretty much the white whale of being an artist And we're doing it all in Southern California It started as a way for artists to come together in a non juried environment So instead of it which is wonderful because what it does is it allows fledging artists you know whether they be glass blowers or painters to start to exhibit their work and start to get a following and people that are willing to work with them as they grow as artists My name is Michelle Burt and I have been a teacher and an exhibitor at the s since 2013 All you're going to do is you're going to put a nice size sort of glob on your paper So I'm just looking at my paper here and I'm looking at my design and I'm going to lay that down into the wet paint And if I do that then I don't need any glue Michelle Thank you so much This has been amazing What do you think I think you did an awesome job I've been making jewelry since I was 21 So about 30 years all my stuff has a tendency to have a little bit of my passion So bees it talks about the importance of bees to our ecosystem and their importance of pollination So it's a way of me educating people but also doing some cool jewelry So there's a lot of fun that I could do with the Hexagon design But then I've also done Moons Stars Ravens Really I just do whatever I feel like you're in one of the most beautiful eucalyptus groves you can find in Southern California and we have wonderful music good food good art friendly people It's a wonderful place Thank you so much to the Newport Beach vineyards and winery for hosting us We had so much fun and if you guys would like to come out for a tasting check out wine Wednesday starting at \$60 a person You get four tasting desserts and you get to meet these guys Come here I got chips There

you go It's not all bad for sheep but you get the point We'll see you next time
Good night everyone
